

2021 PROSPECTIVE PRODUCT CONTENT LABEL²

GREEN-E CERTIFIED - NEW RENEWABLE ENERGY CERTIFICATES¹

This is a renewable certificate product. For every unit of renewable electricity generated, an equivalent amount of renewable certificates is produced. The purchase of renewable certificates supports renewable electricity generation, which helps offset conventional electricity generation in the region where the renewable generator is located. You will continue to receive a separate electricity bill from your utility (if applicable).

This product uses 100% renewable energy certificates (RECs) from wind energy projects:

Energy Sources	This Offer		Generation Location
	Wind	100%	United States
Biomass			
Geothermal			
Eligible Hydroelectric			
Solar			
Total Renewables	100%	United States	

Certification

This is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see www.green-e.org/rec.

Green America Commercial TRC is Green-e Energy certified and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org. For questions regarding terms, pricing or product mix, call Sterling Planet at 877 457 7712.

For comparison, the current average (2020) mix of energy sources supplying the US includes: Natural Gas (40.3%), Coal (19.3%), Nuclear (19.7%), Oil (<1%), Other Gases (<1%) and Renewables (19.8%). The average American home uses 990 kilowatt-hours of electricity per month. [Source: U.S. Department of Energy/Energy Information Administration]

¹ New renewables come from generation facilities that first began commercial operation no more than 15 years ago.

² Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the RECs you purchased during the preceding year.
